

[Manuel Topo France](#)

The french topo install on the internet is in french, here you can find it in english.
On gpstopo.fr you can find more information.

put the CD-Rom in your player, this starts automatically. Select English and go further.
Choose for Full-install if you want all maps on your computer (200 MB), choose for Typical if you want only want to install the required files on your computer (if you run mapsource it will ask for the CD).

choose "run mapsource now", you will get the following screen.
choose for unlock and then choose to "NO I need..."
and choose next

Scroll down and select gps topo,
afterwards choose next.

make sure that your gps has been connected to your computer, this is recognised automatically, and click next. You arrive on the site of gpstopo.fr , on the right-hand side you click on "enregistrer vous".
